

Selecting a headset microphone to use with Rosetta Stone Version 3

A computer headset with microphone is needed to use the Rosetta Stone® Speech Recognition feature. We suggest a USB headset microphone.

For best results with our Speech Recognition feature, we recommend a headset with a directional microphone and noise-cancellation capability. The microphone part of the headset should easily adjust into a consistent position one to two inches from the corner of the mouth.

The preferred headset microphone is certified for speech recognition, either by the vendor or a third party.

Recommended Microphones

Each of the recommended microphones are USB headset microphones that are compatible with both Windows and Macintosh operating systems.
